

Astrological Judgments

And Observations for the Year 1681.

By William Lilly Student in Astrology.

Videmus enim effectus multos hic in terra quos non cognovimus: Beneficia autem vera Astrorum nullum habent principium supra nos in Caelis habere cognoscimus. Et sic patet De Astro: id. We see many Effects here on Earth which we are ignorant of; yet by the benefit of the Stars we know they have a Cause and production in the Heavens.

Deus in Adjutorium!

WE intend by Gods permission, to publish the *Anglican* for 1681, to warn of those contingent Afflictions and perils which may probably be manifested therein, in moderation (without any Satirical expressions or particular reflections) from the conjunctions of the *Suns* *Ingress* into the four Cardinal Points, *perages* *Lunations*, &c. as a fair sign of our work, to reduce our Judgment. For before we begin our *Conjectures* for this present Year, we should be improper to premise any *lamentable* and the rather because many persons may desire concerning those prodigious *signs* *portents* *dox*, and some places *visions* *visions* about eleven in the morning, and with very tempestuous storms and Lightning the night before, which conjunction of the *Sun* and *Moon* with the *planets*

But when the *Bull's Eye* or *Aldebaran*; *Jupiter* and *Mercury* being also in conjunction near the *Plaiades*, which was exactly predicted by *Henry Cady* in his *Nauticus Caeleſtis* 1680: in such words; [*It is likely that more hot than usual's producing Thunder and Chruscations in the Air; but after the New-moon expect it more temperate, &c.*]

Of the middle Region of the Air and what is generated there.

This Region or middle part of the *Air* is generally conceived to be extremely cold and moist by *Antiperistasis*, (viz. the strengthening of a quality against its contrary, or an Encounter of contraries heat and cold) and the effects do also prove the same; for the upper part of the middle Region of the *Air* is made hot by its violent motion, and its nearness to the Element of Fire, and the lower Region by the reflection of the Sun-beams, and so the cold included between them is more violent. Now by the heat of the Sun-beams and the influence of the Stars, *Meteors* are elevated, excluded, or drawn up into this middle Region, and those thick Vapors or Exhalations are often digested and turned into water, from thence descending down like Mists, or in very small drops. And Rain is nothing else but the melting or converting a cloud into water: or according to *Aristotle* It is the Flux of a fertile Cloud resolved by the heat of the Sun into descending drops of water, which being depressed with their own weight, fall down to the Earth; the same in effect may be said of Dew which is nearly related to Rain, nor is Snow and Hail much different from that of Rain, and yet not so hot as that which is the material cause of Hail. For hot things being cooled, are more apt to be congealed than cold; so hot water taken off from the fire, shall be sooner frozen than that which never felt heat. Now Hail is said to be engendered of Rain being congealed into Ice, the drops freezing immediately after the dissolving of the Cloud; or as others say, a Cloud resolved into water and congealed in the fall produceth Hail. *Aristotle* says,

Astrological Judgments 1681.

Considering those various Aspects of the Planets in each Month, as may be seen by the *Epimeris* hereunto annexed, in the Square of Jupiter and Venus, the Opposition of Saturn and Mercury, the Opposition of Mars and Venus in January, and many of the like nature in the other months of this Quarter, whose Portents are very material, as shall be at large illustrated in our *Monthly Observations*, both for this Quarter and the whole year in general. The Moon being posited in a double-bodied Sign and in *Quadrat* to Mars, *res dubias significat*; much dissembling amongst us will be apparent, and I may say generally all over the World, ambiguous Transactions, dubious matters, full of variation, convertible either to good or evil upon a sudden; sometimes men act well, and behave themselves like men, and at other times like *Monsters*. Great friendship is now pretended or offered to some persons only out of design, and purposely to ensnare and intrap them into considerable mischief and trouble—— for Mars is both in *Trine* and reception with Mercury. Many will be forward to cry *Hosanna* the month, and crucifie him the next, and thus will the minds of men vary, crying up the Actions and Endeavours of their Superiors to day, and to morrow as cruelly cry down and condemn them, and not only so, but vilifie and suspect them as guilty of evil designs.—— As for the Diseases of this Quarter, they should not much vary from the last Winter-quarter, to which we refer you, and for the Weather you may see an account how it may probably vary in Mr. Saunders's *Apollo Anglicanus*, or in M. Colby's *Seasons and Signs* for this Year 1681. And thus we conclude our Judgment upon this Quarter, and proceed to the consideration of the Spring-quarter, as followeth.

In the following *Vernal Figure* we have the latter degrees of the *Aequinoctial Sign Libra* ascending, and *Minus* and *Mars* principal Rulers of this Quarter, which we shall consider in our subsequent Judgments—— *Spizus Medicus* to the *Duke of Mantua* writes, That wonderful Effects, such as Wars and Pestilential Diseases, &c. cannot be produced

Astrological Judgments 1681.

duced from simple Annual *Revolutions* without the *Eclipses* of the *Luminaries*, and some other notable *Configurations*, which is also confirmed by that great Master in *Astrology* the Learned *Ptolomy*: *Corpora caelestia non agere in instanti, sed cum tempore*: The Celestial Bodies do not operate upon a sudden, but with some delay. Another says, *Revolutions*, strictly taken, cannot be said to be the causes of natural Events, but rather as Signs only of what Accidents shall happen in such or such a year to those Countries and places for which the *Revolution* is set, according as it hath relation to the then predominant *Configurations* of Heaven (*viz.* of preceding Causes.)— And although the general Accidents of the World are produced from the more superior

Astrological Judgements 1681.

superior Causes, as *Great Conjunctions, Eclipses, Transits* and *Aspects* of the *Planets*, &c. these have a more general and universal signification, yet then shall those *Accidents* most evidently appear and manifest themselves when they are put forward by more inferior causes, as *lesser Conjunctions* of the *Planets*, *Revolutions* both of the *Sun* and other *Planets*, &c. who nevertheless produce many times very notable *Effects* of themselves, which (yet) are subordinate to the general disposition of the *Times*. *Ex Solis existentia in Ariete deprehenditur, vernalem qualitatem cognoscimus*—saith *Ptolomy*, By the *Sun* his entrance into *Aries* we are to judge the *Events* and success of the *Accidents* of the *Spring-quarter*, and not without good reason, since the *Sun* is *Anima Mundi*, the *Soul* and life of the *World*, which is clearly manifested by the increasing quality of *Humidity*, the *Earth* and all things thereon do plentifully abound with at that time; the days do then begin to increase, and the nights diminish, and all things begin to flourish and appear in their greatest lustre and splendour.

Nor is *Ptolomy* singular in his Opinion, That the *Affairs* of a *Kingdom* or *Nation* are to be known from the *Scheme* of the *Suns* Ingress into *Aries* and the other *Cardinal Points*, with regard to the *preventional* and *postventional* *Lunations* and *Eclipses* of the *Luminaries* then operating: his reason is, *Nam ipsas quidem universales constitutiones temporum & modus, &c.* For these general *Constitutions* and the manners of them are caused by the *Sun*, whence even many that are unskilful in *Art* do come to the knowledge of future *Events*. We now come to the consideration of the *Scheme* it self, together with other necessary *Appendants* thereunto, which we intend to make the basis of our Judgment of general *Affairs* for this *Spring-quarter*. In the *Scheme* the *Angles* are partly moveable, and partly fixed, and of the *fiery* and *Airy Triplicity*, and within few hours after this *Ingress* the *Moon* meets a *Conjunction* with the *Sun*, and is therefore said to be a *New-moon*, hence this *Vernal Figure* is the more considerable; yet no *Planet* really

Astrological Judgments 1681.

really Angular but *Venus*. 'Tis further observable; that two *Planets* are posited in *Watry*, two in *Earthy*, two in *Fiery Signs*, and one in an *Airy Sign*; so that all the four *Elements* are herein concerned as to the *Actions* of this *Spring-quarter*. In this Year will manifestly appear very great and superlative *Actions*, signified by some precedent and subsequent *Configurations*, more than from the *Position* of the *Heavens* at this *Vernal Ingress* barely considered—*Matters* of great consequence are near agitation both in *England* and in most *Countries* of *Europe*; yet we are not so superstitious as to assign a Fatal necessity to *Starry influence*, we look upon such *Configurations* or meetings of the *Planets*, &c. as *Messengers* to forewarn us of those *Alterations* and *Vicissitudes* in the *World*, which in convenient time may appear— Now in regard the *Angles* are partly moveable; and partly fixed, we may conjecture, That our general *Affairs* are now in a very unsettled posture, and that a dubious fear shall afflict or possess the minds and fancies of the generality of the *People*, but we say, *Nil timendum— Deus nobiscum—* Let us act courageously and like *Christians*, and never torment our selves with vain fears of any prodigious storm approaching of what nature or kind soever. *Fiat Dei voluntas—*

The *Moon* is posited in a double-bodied Sign near *cauda Draconis*, and hastening to a *Conjunction* (or combustion) of the *Sun* in *Aries*, a violent Sign, which shews the unseled dispositions of the *People* in general, and sometimes sudden and unexpected disturbances and alterations amongst them; also a willingness (or strong propensity) to *Insurrections* or thwarting (in as much as in them lies) the *Designs* of their *Superiors*— But to these matters we say no more but *Cavendum est—*

In the *Vernal Figure* *Mars* and *Venus* are principal *Rulers* of the *Spring-quarter* (as aforesaid)— *Mars* generally produces corruption, and amongst men inclines them to *Wars*, *Seditions*, popular *Tumules*, *Imprisonments*, *Banishments*, *Besieging* of *Towns* and *Cities*; the *Frowns* of

Astrological Judgments 1681.

of Princes upon several of their Subjects, and many eminent Men and Persons of great Quality suddenly arraigned, condemned, and beheaded. As to Diseases *Mars* portends Terrian Feavers, acute Diseases, corruption of Blood, and sudden Death. Also Thefts, Robberies on the Highways, Law-Suits, Duels, &c. In the Air he stirs up great Heats, hot pestilent Winds very pestiferous and infectious, also Thunder, Lightning, Whirlwinds, excessive droughts. In the Sea *Mars* also stirs up impetuous Storms, sudden and violent Shipwracks, &c. He naturally signifies scarcity of Grain, and generally of all such things which grow out of the Earth, occasioned by unnatural heats, that sufficient nourishment cannot maintain the root, or by unreasonable dry blasts of wind before it be mature, or by Mildews, &c. But in regard *Mars* is in *Triune* to *Venus*, who hath also great Rule in this Quarter, much of this evil signification will be mitigated, for *Venus* and *Jupiter* are Planets of a benevolent nature, and *Venus* in this Scheme is very potent, and may produce many delightful Marriages, also a perfect understanding between the Magistrate and People, and all things contrary to those before-enumerated; so that we may justly hope, that the general Affairs of the World for this Quarter should be moderately propitious. We say moderately hopeful, for we have many reasons inducing us to believe this to be a sickly year, many persons will be most intolerably afflicted from old Surfeits now breaking out to purpose into Dropsies, Agues, Coughs, Consumptions, Tympanies, and we fear the Plague or some Pestilential Distemper, which may puzzle some of the most able Physicians to find a Cure for, till some thousands are sent to their long homes. But in other Affairs we believe that neither our home-bred Conspiracies, or Foreign Treasons can contradict the hopeful Influences of the Heavenly Bodies, which plainly portend a happy discovery of all such dark and dismal Attempts, &c.

In our Scheme *Mars* is in *Triune* to *Jupiter*, and *Venus* in *Triune* to *Mars*, and in *Sexile* to *Saturn*, which are

Aspects

Astrological Judgments 1681.

Aspects of Benevolency. Hence we may expect in or near this Spring-quarter many Addresses from several parts of *Europe*, and that there will be many Negotiations on foot for Reconcilement of National Differences: and although not in this particular *Quarter*, yet in this Year 'tis more than probable many ancient men of Noble Families may yield to the Grave, and make their *Exit* into the other World, to the great grief and lamentation of their Children and Relations left alive. Also sudden and unexpected ruines of very ancient Families nearly approaching in some Kingdoms or Countries of *Europe*. Let us but examine and search into the History of Nature, and study the secrets of the Stars, and we shall be thereby informed that some miraculous change in several Kingdoms and Nations of the *European* World is drawing on, or very near manifestation— and if so, then we say, *Multos labores humano generi denuntiatur*, Mankind in general labours hard, and toils to little purpose—— Many difficulties and great calamities befall such poor men who labour in Mines either for Coals, Tin, or Lead. The same may be said of *Fishermen* in *England* and *Holland*, for such persons shall be very unsuccessful in their endeavours, and meet with many considerable losses and crosses, perhaps beyond their expectation, occasioned by stormy winds which must be expected both at Sea and Land—— God divert a Plague from our native Soil, it has been in several places in *Europe* the last two years, and we ought therefore with the *Ninivites* to repent, that the Almighty may be merciful to us—— he can soon bring that mortal Disease amongst us from the remotest parts of the Earth; from which let us all pray, *Libera nos, Domine.*——

The Fancies of most men will now swell with various suspicions, and before this Quarter terminates, there will be a full discovery of several close Designs that have long been secretly agitated between one Nation and another, some discourse hath been privately made thereof, but now we have good grounds to believe a full manifestation of the whole

Astrological Judgments 1681.

whole matter ; but how well it may, please the generality, let time demonstrate. Hence Naval preparations will be made, and yet more firm Leagues contracted than those of late years, or in former times—— But we intend not here to be particular as to any People, Person, or Nation, but to give our Judgment in general upon the Affairs of *Europe*, and now in the close of our Judgment upon this *Spring-quarter* we shall remind the Reader of some Remarks delivered in our *Anglicus* 1677.——*viz.* Now as to the time of manifestation when those so wonderful *Mutations* or *Revolutions* shall be effected or visibly declared or put into action ; we say, That although in part some breakings out thereare in *esse* at present, yet the most violent Actions or dreadful concernments shall not have full manifestation or perfect appearance until three times ten years be added to 1669. which will be 1699.—— Weighty matters require many years for their performances, yet in the mean time the powerful *Configurations* of the superiour *Planets*, the remaining Influences of the *Comet* or *Comets* in 1664. and 1665. and also of that in 1673. have in some measure begun those Effects, which will in convenient time be more apparent long before the year 1699.—— In the year 1682. *viz.* the 20th. day of *October* there will be a Conjunction of the two superiour *Planets*, *Saturn* and *Jupiter*, in 20 degrees of that Regal Sign *Leo*, which is the Terms of *Jupiter*, and wherein he and the *Sun* have their *Triplcity*. It will be the fifth time of their meeting in the *fiery Triplcity* since their *Conjunction* in 1603. at what time they changed one *Triplcity*, and entred into another, which usually (if we may credit Antiquity, Experience, or History) hath not happened without considerable *Revolutions* and changes in the World, &c.——

We have observed that those Conjunctions which have in the year 1603. and since succeeded in the *Fiery Trigon*, have not been accompanied with propitious successes unto *England* or the City of *London*. At the entrance of those *Planets* in the *Fiery Trigon* Queen *Elizabeth* died ; in 1603.

Astrological Judgments 1681.

a great Plague was in *London*, and in the year 1623. the second Conjunction of the superior Planets fell in the seventh degree of *Leo*, not long after King *James* (a peaceable and wise Prince) died. Again in the year 1625. at least 50000 persons died of the Plague in *London*, in a short time after followed the unfortunate business or attempt of the *Isle of Re* in *France*, the Murder of the Duke of *Buckingham*, &c. and during all that time a general murmuring and repining of the common people, especially amongst those of different Judgments, which gave encouragement to, and occasion of our late unhappy Troubles and intestine Wars in *England*.— In the year 1643 the third Conjunction of *Saturn* and *Jupiter* was celebrated in 26 degr. of *Pisces*, but the effects most concerned those people subject to the Sign *Aries*: upon this Conjunction our late unhappy Calamities began, which more or less continued until the year 1652. In that intestine and bloody War many thousand persons, of all degrees and qualities, miserably suffered, and the City of *London*, especially in her Trade and Commerce, with many other strange accidents which are yet fresh in every mans memory.— But what was most remarkable after the year 1663. was that in 1665. the greatest Plague that ever happened in *London*, wherein 'tis credibly reported, that above one hundred thousand people perished, and besides in the year 1666. that terrible and never to be forgotten Fire which destroyed the greatest part of that famous and flourishing City; and these Calamities followed the Conjunction of *Saturn* and *Jupiter* in the Sign *Sagittary* of the Flery Trigon, Anno 1662.— But what manner of accidents have preceded or shall follow this next Conjunction of the Superiours in the Kingly Sign *Leo*, Anno 1682. (which is nearly approaching) some few years will determine.— Something of the effects may be put forward in or about the year 1682. or rather later, with an heavy Vengeance or Judgment on those People and Nations Providence shall dispose the effects to fall upon (especially those under *Leo*) by Wars, Famine, death
of

Astrological Judgments 1681.

of Cattel, several Mortalities, Barrenness of the Earth, and cruel destruction of Mankind. — It portends great Rents and Schisms amongst the Religious Orders of Monks, Friars, Jesuits, as also amongst those of different Judgments, call them by what name you please, and this Judgment is the more aggravated, in regard that these two superior Planets, Saturn and Jupiter, do also meet twice again in the Sign Leo in the latter end of January and May 1683. as appears by Calculation, and also by the Ephemerides of Argel: and hence we conclude this eminent Conjunction of the Superiors in that Kingly Sign Leo to be the Prodromus of very prodigious Effects, which we cannot expect (being now in our seventy ninth year of Age) to live to see transacted — but we say there will be some preceding differences (perhaps verbal) which will begin to break forth at first clandestinely before those great Deluges of Affairs are transacted — viz. Treasonable Consultations, Treachery of Subjects against their Superiors are Plotting, Contriving, or Agitating some years before this Conjunction is celebrated.

Those pretending to Religion, or such as are famous for Schisms, Heresies, or of different Judgments from the profession of that Religion which is established by Authority, will for some years grumble and repine for Restriction of their Consciences, (as they will term it) and the nearer unto the time of the Conjunction it self, or a little after, we fear greater disturbance of those Nations and the Princes they live under, disquieting their Governours; this for Conscience sake, as they pretend. Those that are truly conscientious will not be affected with it: but in some Nations breach of the peoples just Priviledges, ancient Customs, and former enjoyed Rights will animate the generality to a strong and sturdy Rebellion, &c.

Certainly you Princes of Italy, as also the Roman Pontifex or Conclave of Cardinals of the See of Rome, will all of you find great and most grievous distempers in your Governments near the time limited, so will many People and Nations subject to the Romy Triplity.

Astrological Judgments 1681.

Many believe the last Age of the World is at hand, we verily conjecture, that a troublesome and vexatious time is approaching upon most Nations of *Europe*, wherein those pretending to Religion, whether *Papists* or *Seditious*, will shew little mercy or compassion to those persons whose unhappiness it will be to fall under their subjection, of which we might give Presidents very ample.——

The Conjunction of so many Planets in the Sign *Leo* in the year 1682. (as *Septemb. 5.* there is a Conjunction of *Mars* and *Jupiter* in 13 degr. of *Leo*, and upon the 12th. day in the same month in the year aforesaid there will be another Conjunction of *Mars* and *Saturn* in the same Sign, and about 17 degr. thereof, besides those of *Saturn* and *Jupiter* in *Leo* already mentioned) we say gives us very rational ground to predict the appearance of another Comet, very strange Apparitions in the *Air*, or some prodigious Meteors either preceding that Conjunction, or subsequent in a short time after; and we also fear that some extraordinary Fire or Fires may afflict or do considerable damage to many Cities of *Europe*—— God keep this Judgment from the City of *London*, and bless her Inhabitants with much health and prosperity, and deliver her from another Plague or pestilential Distemper in those years aforesaid.—— These Predictions we thought necessary to communicate once more, that the World may see many Accidents which happen therein may be predicted by *Astrology*—— We have not yet this last three years heard of any appearance of another Comet, but the last year produced most terrible Thunder and Lightning which did much damage, and killed both men and cattle in many places of *England*; and in *London*, and some places adjacent, there fell the most prodigious Hail-stones that have been seen this Age. Now what the effects of this next Conjunction may be, some few years will determine—— It is observable, that what matters Divine Providence intends from either the greatest Conjunction, which is very rare and but once in almost 795 years, or from the middle or mean Conjunction

Eion

Astrological Judgments 1681.

Elion of Saturn and Jupiter, which is once in about 198 years odd days, that or these Accidents after some space of time are discovered more manifestly from those little or lesser Conjunctions succeeding which are once in about 19 years 318 days.——

Of the Ingress of the Sun into Cancer, June 10th 1681.

11^h 21 min. post Meridiem.

In this *Solstitial Figure* we find the 21. degree of *Sagittary* Culminating, and 7 degrees of *Pisces* Ascending in the Meridian of *London*, the *Moon* is near the Cusp of the seventh, between the *Sextiles* of the *Sun* and *Venus*, and hastens to a *Quadrant* of *Mercury*, with many other circumstances, which those that understand may (if they please) satisfy themselves—— and to others the *Position* of the *Heavens* at this present *Ingress* will signify very little.—— But as to the Transactions of this *Quarter*, we judge they may be very significant, since we have not only very notable *Configurations* therein, but the three superior *Planets* change their *Signs*, and the *Moon* suffers an *Eclipse* before this *Summer-quarter* is ended.—— And now we fear a wilful obstinacy amongst the people in general, and many Controversies are too apparent. Many great Persons are turned out of their places, and some less deserving (or not so well qualified) promoted and advanced to Honour and Dignity—— *Quanto Sydus est majus, eo etiam effectus Syderis sunt manifestiores*: By how much the Planet, who is the Significator of Accidents in this World is greater and superiour, by so much are the Effects signified by him more visible and manifest. We fear the common people or vulgar sort will suffer much, many tribulations and dangers will befall their persons and Estates, whence will arise great murmuring, dissatisfaction, and repining amongst them in most Nations.—— Nor doth this happen only amongst the vulgar sort, but also amongst those more wealthy and great, viz. the Nobles of Nations betwixt whom 'tis much to be

Astrological Judgments 1681.

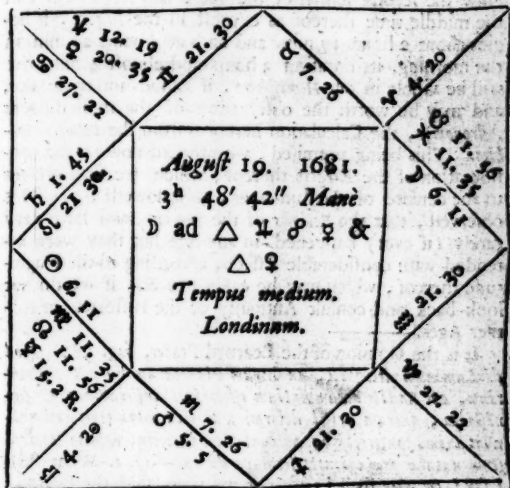

feared) many dissensions and unlucky Combates may arise, and not only so, but many aged grave persons also must expect to be called off the stage by death and sleep the sleep of all the World. It may justly be suspected, that about this time many secret, under-hand (if not treacherous) practices are in agitation, which we have great hopes will never be effected as intended either against *Prince* or *People*; there is a dissatisfied sort of people amongst us, which too frequently endeavour to poison the minds of the people, and promote their own designs— which they are secretly encouraged unto by Persons of no mean Quality.—

In this *Solstitial Figure* we find *Mars* and the *Moon* in *Quartile Aspect* to *Mercury*, the Merchants should suffer loss and damage, and receive very small Returns, their stock should be lessened, and they themselves too often affrighted with false Letters or Reports sometimes framed on purpose.— Many scandalous lying Pamphlets and dangerous *Libels* secretly dispersed, but the Authors thereof (some of them) as well rewarded.— The people in general are not yet free from fears and jealousies, and perhaps some petty Insurrections in some places of this Nation may arise amongst hot-spirited, light-witted Fellows, but to no purpose.— Many exorbitant actions daily appear or break out amongst us, and the same may be expected amongst some of our neighbour Nations, *viz.* *Scotland* and *Holland*, and some others.— But let those Actions that have of late years been performed in *England*, be a warning unto us for the future: For 'tis most certain and true— *Mercurii instabilitas dubia est, necnon manifesta; idcirco calliditas appellatur, habetq; spectem prudentia, quamvis prudentia non sit, sed quedam natura instabilis & dolosa*— which runs to this effect, *viz.* That we ought not to hearken to those busie-witted persons, who would stir up the people to Rebellion; for such persons are unstable, and never manifest their true and full intentions, and therefore they are more crafty than prudent, these have an outward shew of prudence, yet it is not true prudence, but

Astrological Judgments 1681.

but naturally unstable and deceitful, and carried on only for self-ends. — Now in regard there happens an *Eclipse* of the *Moon* this *Quarter*, we shall wave all farther discourse upon this *Ingress*, and consider the *Position* of the *Heavens* at the middle time thereof, which is presented as followeth.

Figura Eclipsis Lunaris.

There will be four *Eclipses* of the *Luminaries* this year, two of the *Sun*, and two of the *Moon*. The first of the *Sun* falls *March* 10. about one of the clock in the morning in the Sign *Aries*, invisible to us, and cannot be seen in our *Hemisphere*, but may be conspicuous to our *Antipodes*. The second *Eclipse* of the *Sun* happens *September* the second

in about 20 degrees of *Virgo* at three in the morning, and therefore not to be seen in our *Horizon*. The first *Eclipse* of the *Moon* will be in 14 degr. 35 min. of *Virgo*, the middle time thereof, *February* 22. about eleven in the morning, the whole duration 2 hours, 48 min. and 8 parts of 12 of the *Moons* body darkned, but invisible to us, and yet may have very considerable Effects in some parts of the World. Now the second *Eclipse* of the *Moon* falls *August* 19. and the middle time thereof as exprest in the *Figure*, it begins about 2 hours 17 min. and ends at 5 hours 20 min. in the morning, its duration 3 hours and almost 4 min. this will be visible in our *Hemisphere*, if Clouds interpose not, and may be worth the observation of the most diligent *Astronomer*, the Calculation hereof is from the *Caroline Tables*. This being premised, we proceed now to the consideration of the Effects thereof, which we shall present to the censure of the Judicious, as followeth; viz. 'Tis observed, that the *Eclipses* of the *Sun* or *Moon* have very rarely (if ever) happened in any Age but they were attended with considerable Effects, according to the Magnitude thereof, which may be easily proved, if we do but look back and consult Antiquity or the Histories of former Ages.

It is the Opinion of the Learned *Peucer*, pag. 382. *Quid de Luminum deliquiis, an horum Planetarum his aut assistentium, aut Radiis accumbentium effectiones inficiabimur & significata, quorum tristi deformiq; aspectu omni tempore hominum animi contreriti expaverunt trepidaruntq; occulto scilicet sensu naturæ presagientes secutura damna— i. e.* What shall I say? or why shall I trifle out my time, saith the Learned *Peucer*, against such as deny the Influence of the heavenly Bodies? What shall we say concerning the *Eclipses* of the *Sun* and *Moon*? Are we our selves, or any rational men, ignorant that the *Eclipses* of the *Sun* and *Moon*, and the Radiations and Aspects of the other *Planets* are concomitant and assistant with those *Eclipses* their good or bad Aspects each unto other? Do we not know, saith he, their signifi-

significations in all Ages have been ominous, and caused mens minds to be terrified by a secret and occult sense of the miseries and calamities those *Eclipses* did presage to be near at hand, or immediately to follow after the same?—

This *Eclipse* happens in the watry Triplicity, and it is the Judgment of several learned and experienced Authors, that an *Eclipse* either of the *Sun* or *Moon* in a watry Sign, viz. any of the watry Triplicity, *Cancer*, *Scorpio*, or *Pisces*, doth usually presage a Rot, Death, Destruction, or Consumption of the vulgar sort of People, many various and groundless fears and Rumors, false Intelligence, frequent Risings, or seditious Conspiracies, unexpected Mutinies in many Countries, especially those under the aforesaid Triplicity— expectation of sudden Wars, and the Spirits of men generally perplexed with the Affairs of the present Times.— Destruction of Water-fowls, and such creatures, both rational and sensible, that are wholly conversant upon the water, or live thereby.— Sudden and unexpected Deluges, or Inundation of Rivers, overflowing the Sea-banks in many places, to the great damage and utter ruine of those poor people or Inhabitants, whose ill Fortune it is to live near those irruptions of the Sea. Also great prejudice to the Trade of Fishing, or amongst Fishermen in general, and sometimes many stately or ancient Buildings demolished or defaced: and this Judgment may in all probability be in part made good in some Cities or Towns in *Flanders* and *Brabant*, or in some of the United Provinces of the *States of Holland*. But we need not search far into what the Ancients have written concerning *Eclipses* and their Effects, but we may consider the Examples of our own Age which are yet fresh in memory, and in particular that of the *Sun* in the year 1652. whereof we wrote (and it was by some called *Black Monday*) we say, if you look no farther, then do but consider the Changes and Alterations which happened during the Effects of the same.—

Dasipodius a Learned Dane in *Aphor. 58.* saith, *Ex Eclipsi-*
bua

bus magni effectus proveniant— i. e. From the Influences of Eclipses great and wonderful Effects do succeed— and from this we now discourse of, let us expect its Effects in its due time upon those Countries principally belonging to the Sign wherein the Eclipse falls, as also upon the whole Quadrangle.—— Cardan says *Seg. 5. Aphor. 45. Eclipses Luminarium super Civitates, Provincias, & Regna magis quàm super private conditionis homines, aut super Reges, respiciunt enim multitudinem*— Eclipses operate more forcibly upon Cities, Provinces, and Kingdoms than on particular persons of private condition, or even upon Kings and Princes, for their effects rather respect the multitude— 'Tis farther said, *Nam etsi naturaliter motu, Conjunctione vel Oppositione nimirum Luminarium prope Nodos sive Caudam & Caput Draconis fiant: tamen defectus illi Luminis non sine effectu est, cum Natura nil faciat frustra; & compertum habeamus Tumultus, Seditiones, Pestes, Famem, Grandines, Inundationes, Calamitatem denique præsertim Solarem portendisse.* Satherus pag. 74. Although naturally by motion in a New or Full Moon near unto the two Nodes (or more properly to the Head and Tail of the Dragon) they become Eclipsed, yet is not that defect or want of light without effect, since Nature doth nothing in vain; and we daily know by experience, that Tumults, Seditions, Plague, Famine, Storms of Hail, Inundations, Calamities of several kinds are ever concomitant or do follow Eclipses, and the more great according to the magnitude thereof.——

The Kingdoms and Countries more particularly subject to the Influence of this Eclipse are these, viz. Portugal, Normandy, Cilicia, Alexandria, Rheims, Wormes, Greece, Lyons, Paris, Basil, Spain, Dalmatia, Hungary, Flanders, Brabant, and divers other places which we silently pass by—and these are the places that will be made sensible of the effects of this Eclipse, and some others, though invisible unto us this year. Hence popular Tumults and hot Disputes arise, and perhaps Wars too, in many of those Kingdoms and Countries foresaid. The Cities of Constantinople in Greece, Tunis, and

Algier

Algier in Barbary, their Merchant and Piratical Ships, &c. their Mariners and Souldiers must in one kind or other at Sea expect to suffer either by Engagements, or shipwrack'd by tempestuous weather.— Part of Scotland, some in Zealand and North-Holland will suffer. These are the places, viz. Cities, Kingdoms, or Countries under the Dominion of the watry Triplicity, and in Opposition and Quadrature to the Sign the defect falls in; which according to the Doctrine of Ptolomy and Leovitius, should be more or less concerned in its effects.

Now as to the Quality of Events we have already given some brief account; but since it falls in *Pisces*, a Sign of the watry Triplicity and double-bodied, we shall enlarge a little farther, and do affirm, that it prenotes strange and unexpected Discords in some Countries aforesaid, also Wars and slaughter of Mankind.— Breach of Leagues, or non-performance of Articles and Covenants between Kings, Princes, and Commonwealths— whence may follow superlative evils— Submersions, direptiones, viarum obsessions, famem, ac pestem— We may expect to hear of the casual drowning of many persons from many parts of the World, some by shipwracks, others by accident, much damage by overflowing of the water, much plundering and ransacking of Houses and Towns.— The High-ways infested by Robbers, Thieves, Souldiers, and many other necessitous persons in many of those Countries already mentioned subject to the Influence of this Eclipse.— Also a great scarcity is portended, and Mortality of humane kind, much unseasonable weather.— Many will be subject to decline their obedience or former affection to their Princes of those Nations they live under. This Eclipse doth also portend a rottenness and corruption of Fruit when 'tis gathered, and may therefore engender Surfeits and sickness to those which eat liberally thereof; and this is all need be said as to the natural signification or Portents of this Eclipse. Lastly, its duration is three hours and about four minutes, therefore its operation may continue at least three months after

after it begins, which may not be very apparent from the time of the *Eclipse*, because it falls in the West Angle. And it is farther observable, That the *Luminary* *Eclipsed* is in Trine to *Mars*, and in Reception with *Jupiter* hasting to the Trine of *Jupiter* and *Venus*; *Jupiter* is Lord of the *Eclipse*, and *Venus* of the South Angle: and this is a *Maxime* in *Astrology*, That the greater the defect is, and the stronger the principal Ruler thereof happens to be in the Scheme, the more eminent and famous should the effects be. Now the premises being well considered, the effects of this *Eclipse* should be much meliorated, and not fall so severely upon those persons concerned, as such a defect in it self naturally portends. Authors tell us, That an *Eclipse* either of the *Sun* or *Moon* in the *Ascendant* hath relation to the Fruits of the Earth, or to the younger sort of people, or to matters newly begun. But if it happen in the Mid-heaven, then it concerns Kings and Princes, or Nobles, Kingdoms, Cities, or Countries, or Persons of great Quality, or men of middle age.— But if it falls in the West Angle or seventh House (as in this present defect) then it portends the change or mutation of Laws and Customs, Contentions, Law-suits, Quarrels, Wars, the death of aged men, and very rarely passes off without some blood-shed or slaughter in those Countries subject to the effects thereof.— But the great strength of *Jupiter* in his Exaltation near *Conjunction* with *Venus* in the eleventh, is an argument those evils portended (at least many of them) may happily be prevented, or suddenly be composed by the honest endeavours of some noble-spirited persons in those Countries and Kingdoms concerned in the effects of this *Eclipse*; and where the wit of men fails in the greatest Councils, God Almighty directs many times beyond expectation. And thus we have followed the Rules of *Ptolemy* and his Disciples— *Qui generaliter accipiunt has omnes significationes ab Eclipsibus que accidunt in annis Conjunctionum Planetarum commiscendo eas cum Revolutionibus annorum: i. e.* Who do take the general significations of yearly
contin-

Astrological Judgments 1681.

contingencies from the Portents of *Eclipses*, when any notable one happens in that or those years wherein any *Conjunction* of the superiour Planets is celebrated, commixing such significations as are derived from those *Eclipses* with what may be drawn naturally from the *Revolutions* of the World.— But we have no *Conjunction* of the superiour Planets, 'tis true, till the years 1682. and 1683. (whose Effects we have already hinted at) but this year we have a *Quadrat* of *Jupiter* and *Mars* from *Gemini* and *Virgo*, *June* 21. Also a *Square* of *Saturn* and *Mars*, *Aug.* 12. from *Cancer* and *Libra*, some few days before this *Eclipse*, and on *November* 28. an *Opposition* of *Jupiter* and *Mars*, which are very remarkable Configurations, and to which may be added the superiour Planets, *Saturn* and *Jupiter*, changing their Signs, &c.

Of the Suns Entrance into the Equinoctial Sign Libra,
September 12th 2^h 50^r PM. 1681.

In which Scheme we find 9 degrees of *Capricorn* Ascending, and 15 degr. of the Treacherous Sign *Scorpio* culminates, the Moon defluxes from the Trine of the Sun, and Sextile of *Venus*, and applies to the Opposition of *Saturn*. But *Saturn* is in Sextile to the Sun, and *Jupiter* in Sextile to *Mercury*, cum multis aliis. Hence no great or remarkable Transactions may be expected this Quarter from what is presented in this Position of the Heavens at the Suns Ingress into *Libra*, but the motion of *Saturn* out of *Cancer* into *Leo*, and the Influence of the preceding *Eclipse* is worth our observation. Many transcendant Consultations and Actions are agitated not only in *England*, *France*, *Holland*, but also in *Italy*, *Germany*, and many other places in *Europe*— *Jupiter* is a benevolent Planet, and now posited in *Cancer* his Exaltation, he intimates that many generous worthy persons, such who have great Power and Command, and qualified with knowledge and understanding in the Affairs of the World; men of sound Judgment in the Laws of Nations, and

and some very Learned, as many Orthodox and Religious Prelates, will be very active and mightily endeavour to regulate such Disorders, Laws, Constitutions, or Edicts either of Princes or Commonwealths, as have heretofore or at this time been the occasion of offence—— and this we hope the high hand of Providence, which orders and disposes all things, may bring to pass for the Honour of those noble Hero's and worthy Agents who act in so good a work.—— Many of our Nation are too apt to perplex themselves with fear of an approaching Invasion, we cannot discover any such thing from natural Causes, the Configurations of the Planets and Stars (who are Gods Celestial Ministers) menace us with no such thing—— The Devil may rage for a season, *sed si Deus nobiscum, quis contra nos?*

But many Divines and Learned persons are of Opinion nothing can be foreseen by the Stars or their Configuration, but we hope their own experience will in time convince them.—— Sir Christopher Heydon has most learnedly shewed, that *Astrology* is of great Antiquity, and that it has been allowed by *Universities*, *Princes*, *Sages*, *Philosophers* from the first infancy of the World to this very time, and will be admired as long as the *Sun*, *Moon*, and *Stars* move in the Heavens. It depends upon as good grounds as any Art. It deals not by Signs and Effects, but by Causes, whereof the Motions, Configurations, and Positions of the heavenly Bodies are grounded upon Mathematical Demonstrations, and the Properties or Virtues of the heavenly Influences upon the Observations or known Experience of great Learned men, even from the beginning of the World; and if Divine Providence do not countercheck the ordinary course of Nature, or the matter of those Elementary Bodies here below be not unproportionable, and thereby unfit to receive their impressions, there is no reason why in a natural and physical necessity, *Astrological Predictions* made according to Art, should not succeed and take effect. It deals not with rare Contingents unknown or undetermined, but with such things which are performed by Art
and

Astrological Judgments 1681.

and Nature. It deals not with mans will simply and directly, but accidentally it doth. It deals with mens Inclinations, Dispositions, Temperature, Affections, and Humours. It meddles not with Miraculous works, nor with Fatal necessity, unless some contingency be joyned with it, nor with Gods Secrets. It is necessary for Physick, Policy, Husbandry, Navigation, Military Discipline, and for Health, &c. So that a man endued with an apt *Genius* and knowledge therein, may in some measure read the admirable Works of God in those his Celestial Ministers their influential and secondary Government of all sublunary Creatures.

Lastly, Having examined the particular *Months* of this year 1681. we find amongst the *Planets* themselves (excepting the *Moon*) eleven *Conjunctions*, six *Oppositions*, fifteen *Squares*, eighteen *Trines*, and one and twenty *Sextiles*, in all seventy one.—— All which we have considered, together with many other Circumstances in our precedent Judgments, and following Observations for each *Month* of the Year. Now from the Influence of these notable *Configurations* and Position of the Stars and Planets (God having so appointed from the beginning) they cause wonderful Mutations in the World; and it is usual, when the *superiour Planets* are in *Conjunction*, *Quadrate* or *Opposite Aspects* one to another very forcible, they do not only cause Rain, Hail, and Tempests, &c. but in many places Wars, Murder, and great Dissention, and other considerable Changes have followed such Positions of those Stars, as we might instance in all Ages in innumerable Examples: See *Henricus Ranzovius* his Examples of Astrological Predictions upon great Conjunctions, *folio 112*. But we desire to give no offence, and therefore shall conclude our Judgment for this Year 1681. but with all people to repent and amend—— *Multa video, pauca scribo: Plus potui plura notui.* Obedience is better than Sacrifice.

William Lilly.

JANUARIES *Observations.* 1681.

A JOVE PRINCIPIVM.

HEavens bless our Kingdom of *England*, and the Rulers thereof in their various Counsels and Debates now under consideration! Matters of no small consequence are near Agitation, and the most generous Active spirits of our Nation act vigorously, not only to prevent Impending Storms, but to settle Affairs, and to remove those Obstacles which at this time lye in the way; producing continual Fears and Jealousies amongst the People. We say farther, that now or near this time, great and worthy Acts are expected from our Superiours, and the whole Month in general, affords most favourable Influences, whence we hope the Year begins well; and many Weighty Matters that have been long in Agitation, are seemingly near Conclusion, and thousands may thereby receive satisfaction—— Yet we must expect many scandalous and injurious Writings, Books, or Libels, chiefly-intended by the Authors and Promoters thereof, to introduce Sedition and Conspiracy amongst us: but we hope Divine Providence may frustrate their expectations, by a happy Discovery thereof—— The *English* seem very active in most parts, but especially in our own Nation; and variety of Intelligence arrives about the end hereof, which will be gratefully accepted, not only by the worthy Merchants of *London*, but many others also——

February hath xxvii.

FEBRUARIES *Observations.* 1681.

THE Heavens seem to intimate very Eminent Consultations now depending; Business of weight, as to national Affairs strongly agitated about the beginning hereof, and much rejoycing at the hopeful progress thereof both in City and Country— We wish a happy period may be put to all Differences, and distempered Passions of the most violent Spirits amongst us, from whom so frequently arise private Animosities, and secret Disgults, notwithstanding the most hopeful indeavours of many prudent Persons to prevent the same— Now all persons generally appear very Active, both at Court, City, and Country— Great are the expectations of the People, and we fear the male Configurations of this Month may produce as remarkable effects, both at home and abroad— Some great Person amongst us not a little molested, or suddenly afflicted; Turbulent spirits, and Male-contented persons express their malice to purpose, let such beware how they disturb and offend their Superiors, by contriving secret Plots and Designs, out of disaffection and from dis-satisfaction; for such persons must assuredly expect most severe correction for such most horrid Crimes— New Accusations may near this time break forth against some offenders; and 'tis more than probable that some notorious Hectors of the High-way may not only be surpriz'd, but apprehended also.

MARCHES *Observations.* 1681.

NOW or near this time many of the most grave and prudent Persons of *Europe* are employed in the most serious and deliberate Counsels, how to carry on the Actions and Negotiations of this *Spring Quarter*; God Almighty direct their indeavours therein: The *Princes* of *Europe* seem to be at a stand in their present Resolutions and Consultations. The winds rise high, and the Distempered fancies of some unsettled Judgments do still endeavour to foment *Faction*, and thereby disturb the *Magistrate* and *Subject* too, let such busy *Agents* be more wary, and rather desist such dangerous practices—— Ambiguous Reports and pernicious Rumours are too frequently spread abroad, but swift-footed time doth manifest the design and end thereof—— God preserve the *English Nation* from all *Epidemical Diseases* this year, and for ever—— Notable preparations are now making to preserve us from future danger, but we are still too much perplexed with the numerous Tribe of *Algier*, *Tripoli*, and *Sally*, to the great Detriment of our *English* Merchants as well as Seamen—— Some mens Honour now *Eclipsed*, others as much advanced by sudden promotion—— as the Proverb is, *Kissing goes by favour*. Good News arrives to *England*, may it ever be so—— Heavens defend the Famous City of *London*, and all her noble Citizens and Inhabitants from all Calamities whatever, whether Fire, Sicknes, losses, crosses, disturbance, or other Casualties——

APRILS *Observations.* 1681.

THE Configurations of the *Planets* the last Month, many of them may have operation in this—For now very transcendant Actions are upon the stage of the World, and most Nations of *Europe* are active; so that we very rarely want matter to exercise our Wonder, and perhaps Fears too—Now we may expect to hear of the breach of Leagues between *Princes*; but whether wilfully broken or dissolved let time determine—Very Deliberate Councils now on foot, both in *England*, *France*, *Holland*, *Spain*, and some Eastern Kingdoms or Countries—and we in *England* receive various Reports from most parts of *Christendom*, and in the general it appears to be good—But the minds and dispositions of the People are in most places desirous of changes, or some novel thing suddenly to break out amongst them, and thence arise many vain Disputes, especially amongst those of dissatisfied Humours, who trouble their Brains to Write and Rant to no purpose—There are a People North and North East from *England*, who naturally pride themselves in Religious Disputes, whose Dispositions and Inclinations tend too much to Sedition; about this time they may smart for their Folly—— *Ex populo multa frans.* Much Fraud and subtilty appears amongst the vulgar sort, and if some people will unadvisedly and rashly accelerate their own Destruction, let them enjoy the just reward of their own deserts: *verbum sapientibus—Fini coronat opus.*

MAYS Observations, 1681.

MAny are the Benevolent Configurations of the Celestial Bodies this Month, whence we do conclude that the Grand indeavours of our Superiours and Rulers tend this month either to a *pacification* or *qualification*. Now we may expect the arrival of some Eminent *Missives*, or Honourable *Ambassadors*, from Countries or Kingdoms remote from *England*, to good purpose; and doubtless much pains is now taken to Compose, Reconcile, and settle a proud, insulting, angry People, who swell with malice, and act very peremptorily against their own Reason and Interest— Let such persons learn to be wiser when they have felt the smart of their follies— We fear sad complaint, not only for want of Trade, but of much Sickness, and danger of an approaching *Pestilence*, or mortal Disease, which may near this time rage amongst the People both in Country and City; from which, *Good Lord deliver us— Mors Regum vel Principum, contemptus Religiosorum, piorum persecutio, cum grandinis nivis & hyemis asperitate sequitur.* Many of Princely or great Families dye; the Religious find contempt, some are persecuted for their Judgments, troubled Spirits are questioned and molested— Much discourse of Plots both secret and otherwise; and towards the months end high Controversies arise, and in all probability an Eminent person amongst us in great danger of Death, or disgrace— *Post mortem nihil est, &c.*

JUNES Observations, 1681.

Certainly this and some succeeding Months must produce very material Overtures in Mundane Affairs; For *Jupiter* and *Mercury* now leave *Gemini*, and make their Ingress into the Tropical Sign *Cancer*; *Mars* after an eight months transit through *Virgo* (which is not usual) enters the *Aequinoctial* humane Sign *Libra*; moreover there are many notable Configurations of the *Planets*, whose effects may be no less considerable, and worthy of the observation of the most Curious, or Critical persons—Great are the expectations of the People, and many difficulties are apparent, both at home and abroad. Matters of great concernment are now under consideration, especially in those Kingdoms, Countries, and Cities, under the *Watry* and *Airy Triplicity*. Now expect great preparation for Sea Action by most Christian Princes, who about this time send forth famous Fleets of Ships, and his Majesty of *Great Britain* continues in much Grandeur, and may challenge the superiority—The truth is, This and some ensuing months, seems full of Actions, and those of no ordinary or mean concernment; great Councils are dissolved and some differences may arise amongst the Nobility: Many in great and high places are removed, or expelled for their transgressions; the vulgar sort dissatisfied—We fear Diseases and other Calamities too much afflict the generality of mankind, and many persons suffer much by Poverty—*Infortunia in multis climatibus*, Great Casualties, and many unfortunate Miseries befall in some climates—

JULIES Observations. 1681.

H Eavens bleſs the *English* affairs, and direct the great Councils of his Maſteſty! The three Superior *Planets* all in Cardinal Signs, do ever manifeſt the tranſcendency of thoſe Actions then depending. Perſons of Eminency are now called in queſtion, and a Reformation pretended. The Actions of theſe times are very various, and men do even ſwell with Rancor and Malice one againſt another: *Inter principes viros contentiones graviffima*, amongſt the Nobles of Nations very great Controverſies ariſe, unpleaſant Tranſactions, ſcandalous Rumours and Reports againſt perſons of great Quality. A ſtorm is expected, but who knows on what perſons it may fall? *Iras populares ambiguas*: The vulgar ſort diſpleaſed, and male-content, *in hominum genere labores multos*. Mankind ſuffers generally in many Countries; complaints upon complaints, & *quid non*: Yet ſome notwithstanding get preferment, and others are diſgracefully routed and turned out of their places—*Holland* and *Scotland* are threatned more than other Nations with ſome Calamity, which by this time will be apparent—War or other Miſchief attends ſome of our neighbour Nations; as alſo many Alterations, Changes, and Revolutions, and yet we have great hopes we continue moderately quiet at home. *Fiat Dei voluntas*—

AUGUSTS Observations. 1681.

WE of the *English Nation* are not yet free from doubts and fears of some impending Rupture that may unhappily break out amongst us: But we hope God Almighty will so direct this Nations Counsels and Actions, that we need not fear Ruine, Destruction, or any considerable injury, from our most hateful enemies, either at home or abroad. This Month the pondrous Planet *Saturn* transits out of *Cancer* into *Leo*, and *Mars* out of *Libra* into that false and Traiterous Sign *Scorpio*, which we say may not only cause a considerable alteration in the Air, but produce also several changes in Mundane Affairs, though it may not be very apparent this month, but its operation may be expected gradually from hence to the end of the Year— And now Death in good earnest removes many aged persons of different Qualities, in many parts of Christendom, amongst the rest his Holiness is menaced— *Omnium rerum vicissitudo est*. About this time expect many high and weighty Consultations very seriously debated, tending to the Regulation of old Customs and Priviledges, and the Extirpation of others— Now discontented Spirits begin again to act their parts, and to put forward their devilish Designs, we hope no more Plots— But we have for many years observed that the (*Conjunction* or) *Quadrante* of *Saturn* and *Mars*, very rarely pass over without leaving some remarkable impression of their Influence. *Tempus omnia revelat.*

SEPTEMBERS *Observations.* 1681.

THE Enemies of *England* are many, but the most dangerous are those *Domestick*— Some Traiterous Actions now discovered about this time, and the Original cause thereof laid open; Peoples Spirits are now heated to purpose— Very many *Debates, Conventions, Assemblies, Meetings* and *Treaties* on foot, to reconcile and compose the present Differences of many Nations in *Europe*— The visible *Eclipse* of the *Moon* the last month, and the invisible *Eclipse* of the *Sun* at the beginning of this, may manifest their effects suddenly, and a very sickly time may be much feared; It's Gods great mercy unto us if we escape, and that affliction be deferr'd to another year; *Saturn* now in *Leo* we judge may influence (as heretofore) most dismal Effects to poor Mortals— *Avertat Deus.* Great Calamities sorely oppress many poor people, and we may truly say, *dubitandum quod significabit dolores longinquos secuturos, & ex illo mortem:* The Afflictions now feared may be of long continuance, and occasion the Death of many. Matters begin to appear very formidable in several Countries in *Europe*: Let *Italy* beware— Some Illustrious Person in danger of Death by Poison; and Men of Eminent Quality in several Countries leave their Places, Offices, or Commands, some most willingly resign up their Trust, others by force are deprived of their Honour— *Omnis Potestas à Deo est.*

OCTOBERS *Observations.* 1681.

NOW we may expect something of the Effects of the late Lunar *Eclipse*, put forward by those many Configurations of the *Celestial Bodies* this month, which may produce very various *Actions* and *Transactions* therein— For if ever there appeared great and serious Counsels in *Europe*, we presume now is the time: God direct his Majesty of Great *Brittain*, and give him the Fortitude of *David*, and Wisdom of King *Solomon*— Accusations and Complaints against some persons in power may now be expected— The Merchant complains for his losses at Sea; and many scandalous Papers are emitted to asperse Persons of Honour. Unlucky Counsels now on foot, and Men of all Dignities must expect molestation in one kind or other, from disaffected Agents: Let the Princes of *Italy* prepare for, or endeavour to prevent approaching Trouble— And it is very probable within some short time we may receive Intelligence of many Dissentions and Controversies that may arise in the Conclave of *Rome*, amongst the *Cardinals*, or the Death of some of the superiours of *Monasteries* and *Priories*— The *Imperial Territories* in much fear and danger of Invasion: It requires the wisdom of the most prudent persons in many Nations of *Europe*, to manage and carry on the general Affairs thereof— some are Imprisoned, others enlarged; 'tis a busy time in earnest; Heavens defend us from future Divisions in matters of Religion, for here appears much sickling, and every man strives to advance himself— *Aut Caesar aut nihil*—

NOVEMBERS *Observations.* 1681.

THE various Configurations of the last Month are yet in Operation, and the effects thereof we may be sensible of in this— Some eminent and deserving Person of our Nation preferr'd, or advanced to Honour near about this time; and many Addresses are made from Foreign parts; we are still busy and in great expectation of famous things—and we shall find much variety of several seeming transcendant Actions: *Parturiunt Montes.* The vulgar man malecontented—and some take great pains (yet with much subtilty) to excite the people to Mutiny or a Rebellion— *Multiplicabuntur Latrocinia & abscissores viarum*— The Highways are infested with Thieves, and the Seas with *Pyratical Corsaires*; and Pamphlets are Printed and dispersed to the great scandal of Authority; we may justly fear also, *Captivitates, injurias, malorum licentiam, & magni alicujus viri mortem*: Many suffer by Imprisonments, others Prosecuted injuriously— The Courts of Justice sufficiently afflicted with various and difficult concernments— Abundance of Intelligence arrives from most parts of *Europe*— Many are now Angry in earnest, the Domestick Divisions of this Month appear very considerable— An unwholesome Season; and the Air Infested, and the Bodies of men Corrupted— Many ill Offices are done betwixt Persons of Honour, we fear purposely, to engage a party for private Ends— *Cavendum, Changes, Catastrophes*, and sudden Mutations are by many expected, but they approach not yet— Decem.

December hath xxxi days.

1	f	Sun rises 10 min. after 8, sets 50 min. past 3.
2	g	
3	a	
4	b	<i>Second Advent.</i>
5	c	
6	d	
7	e	
8	f	First Quarter 36 min. past 5 in the morning.
9	g	Days shortned 8 hours 3 Quarters.
10	a	Sun rises 13 min. after 8, sets 47 min. past 3.
11	b	<i>Third Advent.</i>
12	c	
13	d	
14	e	
15	f	Full Moon 52 min. past 1 in the morning.
16	g	<i>Ember-week.</i>
17	a	
18	b	<i>Fourth Advent.</i>
19	c	
20	d	Sun rises 9 min. after 8, sets 51 min. past 3.
21	e	St. Thomas Apost. Last Quart. 8. m. p. 8 at night.
22	f	
23	g	
24	a	
25	b	<i>Nativity of Christ, or vulgarly, Christmas-day.</i>
26	c	St. Steven Martyr.
27	d	St. John Evangelist. Days lengthened a quarter of
28	e	<i>Innocents.</i> (an hour)
29	f	New Moon 26 min. past 8 at night.
30	g	
31	a	

DECEMBERS *Observations.* 1681.

WE now draw near the end of 1681. and still we are too subject to discompose our Spirits with Cares, Fears, and other perplexities; Let us hope well and trust to Providence: The former Months, and this also seems to afford us plentiful Matter to work upon— And the Insolency of many Persons of no mean quality appears. If any such persons have been Active in the Contrivance of some late Plot, Design, or Conspiracy, against their Superiors; we say, *Blood goes not unto the Grave without retaliation:* We shall now or never discern our friends from our foes; let us not add more fuel to the flames, nor go about to foment popular Commotion. Many do now bemoan their sad fate when 'tis too late, for the Arrows of Heaven are dispersed amongst them— The Year ends with Discontent to most men, and great things are yet in Expectation— God bless his Majesty, Council, City, Nobles, Gentry, and the whole Kingdom of *England* in General— And thus we conclude the Year with hopes, but not assurance of better days—

These are our probable Conjectures, but not positive Conclusions. *Astra vera sunt creata non modo ut luce terram compleant, verum etiam ut signa rerum declarare futura: rum.* Philo Judeus.
